TECHNICAL SKILLS SQL | Tableau | Jira | Confluence | Snowflake | KNIME | SAP | Python (Automation) | Vertica | WMS | ETL Pipelines | Data Warehousing | Forecasting & Predictive Analytics | AI Tools: Cursor/Claude

PROFESSIONAL EXPERIENCE

Senior Program Manager, RRC Entitlements and Policy Operations, Chewy | Fort Lauderdale 06/2026 – Current

Responsible for enterprise entitlement governance across Refunds, Replacements, Concessions, and Discounts & Adjustments (D&A), partnering with Product, Customer Care, Finance, Operations, and Engineering teams to translate policy into scalable customer outcomes. Own the development of decision frameworks, operational controls, and automated entitlement logic that improve policy adherence, reduce discretionary spend, and enable consistent execution across agent-assisted and self-service experiences.

- Established the enterprise entitlement strategy and governance framework for refunds, replacements, concessions, and D&A, defining decision logic, escalation paths, operational controls, and policy guardrails that improved consistency, reduced risk, and aligned customer experience with financial objectives.
- Led cross-functional programs across Product, Engineering, Customer Care, Finance, and Operations to operationalize policy into scalable workflows and automated decisioning systems, enabling self-service adoption, reducing manual intervention, and improving execution quality.
- Developed executive reporting and performance management frameworks that provided visibility into discretionary spend, entitlement utilization, override trends, policy adherence, and customer experience outcomes, driving accountability and data-driven decision making across leadership teams.
- Owned resolution strategies for complex customer and operational edge cases including Dropship, Third-Party (3P), Pharmacy, and non-standard fulfillment scenarios, creating scalable governance models that balanced customer satisfaction, cost management, and operational efficiency.

Senior Program Manager, Vendor Compliance and Operations, Chewy | Fort Lauderdale 08/2024 – 06/2026

Accountable for defining and executing Chewy's vendor compliance and performance strategy, leading a team of 6 across program management, business engineering, and analytics. Own governance, operating model design, and multi-year initiatives balancing cost recovery, service reliability, throughput, and scalable growth, while partnering with C-suite leaders on white papers, investment prioritization, and strategic trade-offs.

- Transformed vendor compliance operating model into a data-driven revenue and performance engine, generating \$20M in incremental annual value while improving labor efficiency by 15% and reducing vendor defect rates by 30%+.
- Launched a net-new enterprise chargeback platform across 10 defect categories, transforming legacy Python processes into a scalable SPARK-enabled model that drove company-wide adoption and generated \$12M in incremental annual revenue.
- Drove measurable vendor performance gains through expanded compliance metric adoption, increasing EDI (855/856) compliance by 15%, improving carrier OTIF by 5%, and raising packaging and dunnage compliance by 8%.
- Led 100+ executive-level vendor collaboration reviews with senior leadership across EDI, operations, supply chain, and warehouse functions, driving \$30M+ in automation and equipment investments, implementation of QA controls, and standardized data integrations and SOPs to improve KPI compliance and operational performance.
- Standardized governance and execution across 24 compliance specialists enterprise-wide, driving 30% improvement in logging performance, 15% in task prioritization, and 10% in data accuracy; introduced enhanced root-cause taxonomy and vendor-facing reporting to accelerate defect resolution and improve long-term performance.
- Led and developed a high-performing, cross-functional team of 6 (PMs, BIEs, BIAs), implementing a scalable operating model with defined decision rights and quarterly OKRs tied to executive white papers and annual strategic priorities, driving accelerated execution and measurable enterprise outcomes.

Senior Program Manager, CPFR and Supply, Chewy | Denver, CO**03/2022 – 08/2024**

Developed integrated planning capabilities spanning demand planning, replenishment, supplier engagement, and S&OP/S&OE by scoping, designing, and launching Chewy's CPFR program as a net-new enterprise operating model. Defined multi-horizon planning strategy and built short-term risk and opportunity tools, improving network-wide in-stock performance across 2,000+ vendors.

- Drove enterprise-wide optimization of vendor production planning and replenishment, leveraging standardized data, processes, and thresholds to deliver 5%+ OOS reduction, 4% location-level OOS reduction, and \$10M+ in optimized savings.
- Led monthly vendor performance reviews integrating supply and demand data; built API-driven data sharing and automated reporting pipelines (8+ reports), enabling real-time insights and driving 40%+ gains in efficiency and actionability.
- Built and deployed 10+ Tableau dashboards paired with SOPs and operating playbooks, translating complex supply and demand signals into repeatable, decision-ready workflows adopted across planning and vendor teams.
- Institutionalized governance and escalation across 20+ critical supply chain metrics, creating Non-Optimal Placement (NOP) based on deep business insight as a top-five supply chain metric and deploying exception-based reporting that accelerated decision cycles by 20%+ and enabled proactive issue resolution.

Supply Chain Manager, T-Mobile | Seattle, WA**08/2019 – 03/2022**

Responsible for end-to-end supply planning and inventory management of the \$1.5B Apple portfolio supporting 7,000+ retail locations and 1,000+ SKUs. Led demand and supply planning, inventory optimization, supplier collaboration, risk mitigation, systems transformation, and executive decision-making to support new product launches, merger integration, and service level performance across the largest wireless retailer in North America.

- Directed inventory strategy, demand signal management, and replenishment planning for the Apple portfolio, achieving a 2% Retail Stock Out rate versus a 3% target, avoiding approximately \$80M in inventory exposure, and influencing leadership to cancel \$60M in purchase orders while exceeding financial write-down targets by \$1.6M.
- Led supply planning, capacity management, and launch readiness for the largest Apple NPI in company history, orchestrating over \$1B in product launches while aligning Procurement, Operations, Logistics, Retail, and Executive Leadership to ensure inventory availability and service level attainment.
- Established supplier risk mitigation and business continuity strategies during COVID-19 supply constraints, partnering with Procurement and Apple to manage capacity limitations, portfolio prioritization, allocation planning, and executive scenario modeling to protect revenue and customer experience.
- Served as a key leader in the Sprint merger integration and enterprise planning transformation, overseeing the migration of 3,000+ retail locations from JDA to SAP/ECC, enhancing replenishment processes, reporting governance, inventory visibility, and planning system capabilities while leading multiple technology and process improvement initiatives.

Senior Operations Analyst, PepsiCo | Dallas, TX**03/2018 – 08/2019**

Responsible for operations and logistics for 5 major markets and provided oversight to locations and team members for the collection, analysis, evaluation and reporting of T/L activities (e.g. performance metrics, SLAs, scorecards, cost models, P/L, etc.).

Drove sales pilot program to analyze NAN sales in Torrance, CA which resulted in a 40% growth in revenue.

- Successfully reduced operation annual expenses by 10% or \$1.2 million by leading cost reduction and productivity initiatives, fleet management, and enhancement features.
- Effectively built DRT reports to improve ADAS to 90% and above for Q1 and Q2 of 2019. Instituted new FSV standards to increase volume by 20% from PY and cascaded to the analyst teams.
- Leveraged Tableau to communicate dashboards to senior leadership on operations KPI categories: P/L metrics, Payload Productivity, Off Day Orders, Manifest Compliance, Under Minimums, Delivery in Full to meet EOY targets.
- Coordinated and advised a multi-million dollar initiative to convert Torrance, CA to GEO system. Worked with the delivery team, S&D Ops, Sales team, and the Market Director to achieve the first successful Go-Live of the California region (Received W2G Award from the Market Director).

Supply Chain Analyst, PepsiCo | Denver, CO**2015 – 2018****Field/Warehouse Inventory Analyst, Kasco | St. Louis, MO****2014 – 2015****Transportation and Logistics Analyst, Anheuser-Busch | St. Louis, MO****2013 – 2014**

EDUCATION

B.S in Business Administration and Economics, Southern Illinois University Edwardsville, 2013
